

Drop-In Full Mirrored Domes

Drop-In Domes are easy to install into an established grid ceiling system. The 2' x 4' model is a 2-piece unit that has a full panel with a hole to match the diameter of the dome to be used.

Our 2' x 2' unit is a formed one-piece dome that easily drops into a 2' x 2' grid opening. A One-Piece Dome can be used in a 2' x 4' opening. A 2' cross-bar will need to be inserted into the grid to section the larger panel in half.

The view distance ratio is about 1 foot of viewing distance to each inch of the diameter of the dome. Due to the nature of these domes, they are made in only an 18" and 22" model. These domes are also available in See-Through mirror and transparent colors for surveillance cameras.

Made in U.S.A.
