

# Office-Eye™ Hallway Mirrors

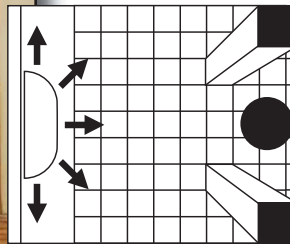

Ideal for Elevators

One of our newest products is our Office-Eye™ mirror. This unit is designed to be used in office or hallway applications. Office-Eye™ mirrors are compact and mount tight against the wall.

This mirror should be mounted at eye-level to provide the most efficient viewing angle. Directly across from an office door or at a “T” intersection is the most common location for these oblong mirrors.

Viewing distances range up to 20 feet in each direction, preventing employees from running into each other when entering a busy hallway. Office-Eye™ mirrors are commonly used in hospital hallways to prevent contact with bulky moving equipment or patient transportation.

The appearance is sleek and fits into any decor. This unit has the same function as our 180 degree dome without being limited to just the ceiling mount option.

Made in  
U.S.A.
