

90° Mirrored Quarter Domes

The 90 degree Corner Dome is not usually used in an industrial application. Its value is more directed to offices, hospitals and retail stores. These mirrors are one quarter of a standard dome, so they will have the identical curved surface as the full or half dome.

Mounting is easy with the provided screws and anchors. One of the standard locations for this item is a waiting room, providing the receptionist with a wide-angle view of the lobby. Elevators would require small quarter domes, due to the confined area and the small coverage area needed.

MFG#	DESCRIPTION
ONV-90-18	Acrylic Quarter Dome Mirror, 18"
